

Late Spring and Summer BYOT (Bring Your Own Tree) schedule  
\$30 / class

The April Boxwood workshop concluded our transplanting workshops until this October when we will feature our next series. However, the work is not done. Beginning Saturday May 14<sup>th</sup> Michael will be working on Phase 2 of the development process. If you started a tree during one of Michael's workshops, now is the time to bring it back for the next look. Michael will be checking the health, continuing the styling process and most importantly helping you balance the growth habit of your tree.

**May 14<sup>th</sup>** – Junipers, broad leaf evergreens and all deciduous trees should return for balanced growth pruning, additional wiring / shaping and health check / feeding.

**June 11<sup>th</sup>** – Any deciduous not able to come to the May meeting should come in now, plus this is the earliest time to decandle and needle pull Pines (this is a very important step in Pine development and should not be skipped) we will also continue shaping Junipers and perform the quarterly health check / feeding.

**July 9<sup>th</sup>** – this is the last best time to decandle and needle pull Pines (this is a very important step in Pine development and should not be skipped) and perform the quarterly health check / feeding.

**August 13<sup>th</sup>** – This is a good month for shaping and balanced growth pruning for any strong growing Junipers, broad leaf evergreens or deciduous trees. This is also a good month to check / remove wires from trees shaped earlier in the season.

**September 10<sup>th</sup>** – this is the final month for trimming and shaping junipers, broad leaf evergreens and deciduous trees in preparation for the dormant season. We will remove any wire that was placed in the early part of the season, check the health, and maintain the quarterly feeding schedule.

All of these workshop dates will need to be booked in advance as “BYOT” (bring your own tree) and will consist of morning 9am – 12pm or afternoon 1pm – 4pm classes. To insure that everyone gets the same attention... there is a limit of 1 large tree (under 34”) or 2 small/medium trees (under 15”), per person per class. Tools and wire will be provided.

Additionally, for anyone interested in help with any trees that were not included in the original workshop series, Michael is well versed with all varieties of deciduous trees, broad leaf evergreens and evergreens. These classes are designed to help you with the growing process, styling, growth balancing, health and feeding concerns.

All class sizes are limited... To best serve you, please contact Diana at Kimura Bonsai Nursery to reserve your time in advance. (818) 343-4090
